

New RTLS Patient Badges

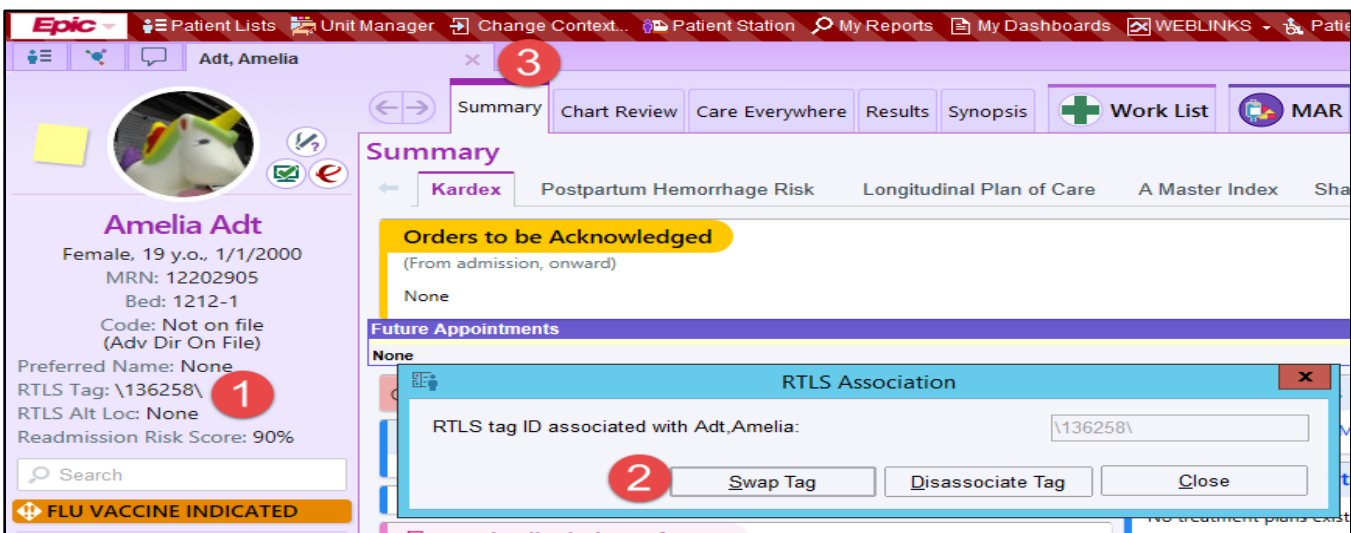

In order to optimize the infrastructure functionality, we will be upgrading Midmark patient locator badges on Sunday, October 27, 2019.

A key talking point for staff to explain to patients:

- The button on the pt badges has no function; it will not call their nurse, for example.

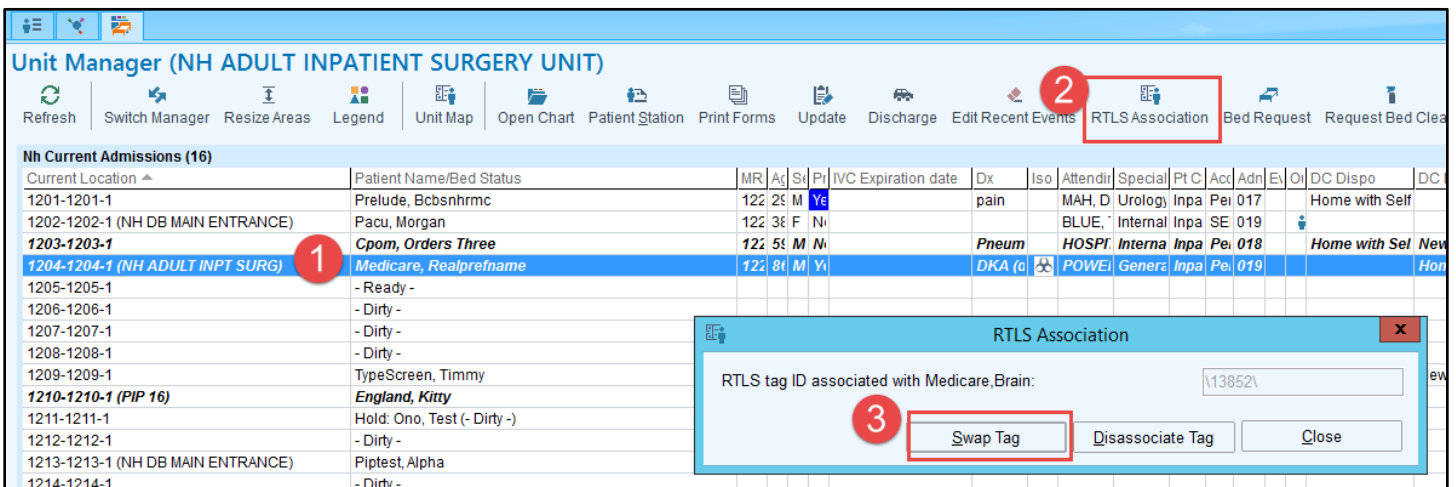

To Swap out old pt locator badge with new badge: Easy as 1-2-3!

- Click into the RTLS Tag field right on Storyboard or Go to Unit Manager, Status Board, Trackboard, or Greaseboard and single select patient
- Click the RTLS Association icon along the top icon toolbar
- Click Swap Tag and Scan barcode on the back of the new pt locator badge into scan field

The screenshot shows the Epic patient summary for Amelia Adt. A red circle '1' highlights the RTLS Tag field in the patient information section. A red circle '2' highlights the 'RTLS Association' dialog box, which contains the text 'RTLS tag ID associated with Adt,Amelia:' and a text input field containing '\136258\'. Below the input field are three buttons: 'Swap Tag', 'Disassociate Tag', and 'Close'. A red circle '3' highlights the 'RTLS Association' icon in the top toolbar.

From Unit Manager:

The screenshot shows the Epic Unit Manager interface for the 'NH ADULT INPATIENT SURGERY UNIT'. A red circle '1' highlights a patient row in the 'Nh Current Admissions (16)' table. A red circle '2' highlights the 'RTLS Association' icon in the top toolbar. A red circle '3' highlights the 'RTLS Association' dialog box, which contains the text 'RTLS tag ID associated with Medicare,Brain:' and a text input field containing '\13852\'. Below the input field are three buttons: 'Swap Tag', 'Disassociate Tag', and 'Close'.
