

AAA

Abdominal Aortic Aneurysm

Know your risk. Get screened.

Facebook/Social media

1. A ruptured AAA can be deadly. Finding out if you're at risk is simple.

2. Are you at risk for AAA? Talk with your doctor about screening if you are ONE of these: over 65, smoke, have diabetes, overweight, have high cholesterol or high blood pressure.

<https://nhrmc.org/services/heart/screening/AAA-screening>

3. Ask your doctor to screen for AAA. It's simple, and can be lifesaving.
