For our spinal cord injury patients: Where to turn for help

The staff at NHRMC Rehabilitation Hospital understands that patients and their loved ones have many questions and concerns as they adjust to different challenges resulting from a spinal cord injury. We are here to help answer those questions and address your concerns, so you can concentrate on the most important part of your journey – healing. Combining highly skilled clinical resources with an integrated course of rehabilitation treatment, NHRMC Rehabilitation Hospital is well-equipped and prepared to help you return to your daily life. To further assist you, we have compiled the following list of community and online resources available to spinal cord patients and their families.
