

Influenza Vaccine BPA Ambulatory

If a patient has not had a flu vaccine documented this season based on Health Maintenance in Epic, the BPA will fire. From the BPA, you can order the immunization from the SmartSet, document a historical Immunization, or postpone for future administration.

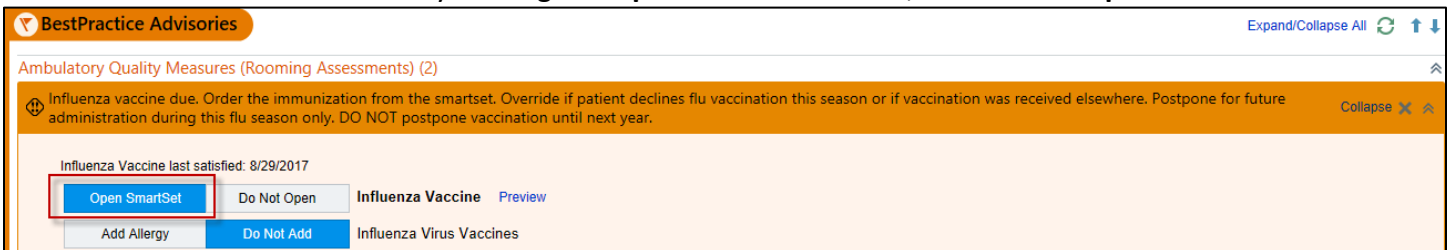

Try It Out

1. The **Best Practice Advisory** will alert if the Influenza vaccine is due.

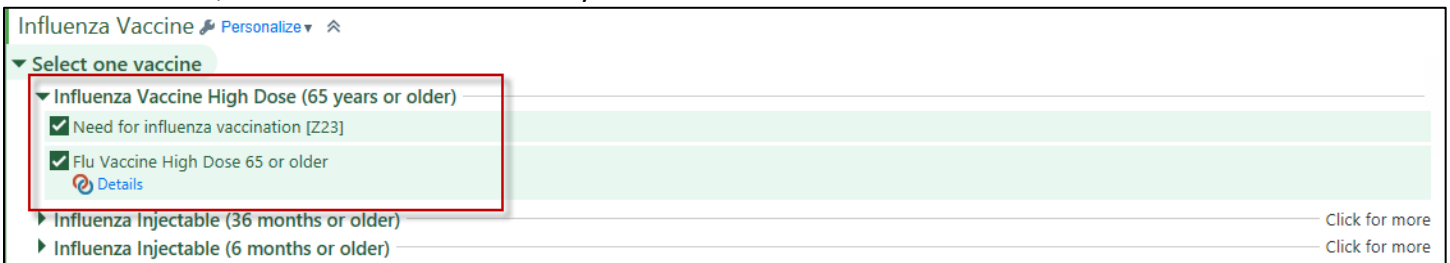

The screenshot shows the 'BestPractice Advisories' section in Epic. A red-bordered box highlights an advisory: 'Influenza vaccine due. Order the immunization from the smartset. Override if patient declines flu vaccination this season or if vaccination was received elsewhere. Postpone for future administration during this flu season only. DO NOT postpone vaccination until next year.' The advisory includes an 'Expand' button.

2. Order the Immunization by clicking the **Open SmartSet** button, and click **Accept**.

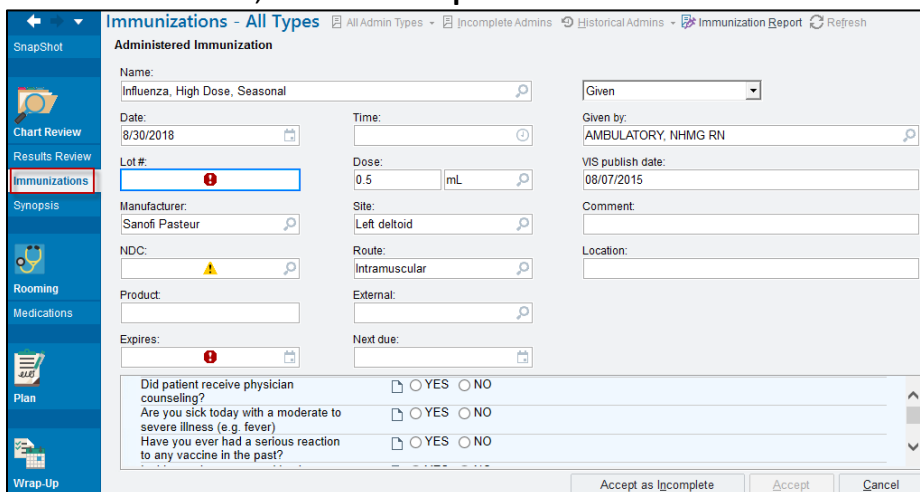

The screenshot shows the 'BestPractice Advisories' section. A red-bordered box highlights the 'Open SmartSet' button. Other buttons visible include 'Do Not Open', 'Influenza Vaccine Preview', 'Add Allergy', 'Do Not Add', and 'Influenza Virus Vaccines'. The advisory text is also visible.

3. The SmartSet will display the appropriate choices by age for the patient.
 - a. Select the product you would like to order and the diagnosis will automatically associate. Sign the order, and the medication is ready for administration.

The screenshot shows the 'Influenza Vaccine' SmartSet. A red-bordered box highlights the 'Influenza Vaccine High Dose (65 years or older)' option, which is selected. Below it, 'Need for influenza vaccination [Z23]' and 'Flu Vaccine High Dose 65 or older' are checked. Other options include 'Influenza Injectable (36 months or older)' and 'Influenza Injectable (6 months or older)'. There are 'Click for more' links for the injectable options.

- b. From the immunization activity, click **Administer** and complete the Administered Immunization Documentation, and click **Accept**.

The screenshot shows the 'Administered Immunization' form. The 'Name' field is 'Influenza, High Dose, Seasonal'. The 'Date' is 8/30/2018. The 'Dose' is 0.5 mL. The 'Site' is 'Left deltoid'. The 'Route' is 'Intramuscular'. The 'Manufacturer' is 'Sanofi Pasteur'. The 'Product' is 'Influenza Vaccine High Dose 65 or older'. The 'Expires' field is empty. The 'Given by' field is 'AMBULATORY, NHMG RN'. The 'VIS publish date' is 08/07/2015. The 'Comment' field is empty. The 'Location' field is empty. The form includes several checkboxes for documentation: 'Did patient receive physician counseling?' (YES/NO), 'Are you sick today with a moderate to severe illness (e.g. fever)?' (YES/NO), and 'Have you ever had a serious reaction to any vaccine in the past?' (YES/NO). The form has 'Accept as Incomplete', 'Accept', and 'Cancel' buttons at the bottom.

- c. For practices who utilize the MAR, enter the appropriate administration information including the **Lot Number, NDC Number and Expiration Date.**

4. **Override** if the patient declines the flu vaccine this season or if the vaccination was received elsewhere. **Postpone** for future administration during this flu season only. **DO NOT** postpone vaccination until next year.

5. If there is a contraindication, click the **Add Allergy** button and indicate the type of **reaction**.
*Click the **Do Not Open** button for the SmartSet.

*Note the new acknowledge reasons for **Vaccine unavailable during this visit** and **To be addressed during rooming this visit**:
