Non-emergency transportation by ambulance is appropriate if either: the beneficiary is bed confined, and it is documented that the beneficiary's condition is such that other methods of transport are contraindicated; OR, if his or her medical condition, regardless of bed confinement, is such that transportation by ambulance is medically required. (Bed confinement is not the sole criterion.)

To be "bed confined" the patient must be: (1) unable to get up from bed without assistance; AND (2) unable to ambulate; AND (3) unable to sit in a chair or wheelchair (Note: All three of the above conditions must be met in order for the patient to qualify as bed confined)

1) Is this patient "bed confined" as defined above? ☐ Yes ☐ No

2) Describe the Medical CONDITION of this patient AT THE TIME OF AMBULANCE TRANSPORT that requires the patient to be transported on a stretcher in an ambulance and why transport by other means is contraindicated by the patient's condition:
